WORK EXPERIENCE

[Splendid Mark](#) | MERN Stack Developer

(Mar 2025 – Present)

- Designed, developed, and maintained dynamic web applications using the MERN stack (MongoDB, Express.js, React.js, Node.js, PostgreSQL), ensuring high performance, scalability, and maintainability.
- Deployed and configured applications on VPS environments, optimizing server performance, security, and uptime.
- Collaborated effectively with cross-functional teams, including designers, project managers, and QA testers, to deliver feature-rich, user-friendly software solutions on time.
- Implemented RESTful APIs and integrated third-party services to extend application capabilities and improve user experience.
- Proactively researched and adopted emerging technologies, frameworks, and best practices to enhance development workflows and product quality.

[Streams Consultants](#) | MERN Stack Developer

(May 2024 – Mar 2025)

- Developed and maintained web applications using the MERN stack (MongoDB, Express.js, React.js, Node.js), ensuring robust performance and scalability.
- Collaborated closely with cross-functional teams, including designers, project managers, and QA testers, to deliver high-quality software solutions.
- Implemented RESTful APIs and integrated third-party services to enhance application functionality.
- Stayed updated with the latest industry trends and technologies to improve development processes continuously.

[Knowledge Streams](#) | MERN Stack Trainee

(Jan 2024 – Apr 2024)

- Underwent rigorous training in PostgreSQL, Express.js, React.js, and Node.js as a MERN Stack Trainee at Knowledge Streams.
- Actively participated in project simulations to apply learned concepts and techniques in real-world scenarios.
- Demonstrated proficiency in troubleshooting technical issues encountered during project development.
- Prioritized continuous skill enhancement through self-directed study and exploration of additional resources.
- Emphasized effective communication and collaborative teamwork to contribute effectively to development projects.

PROJECTS

[FlexiFly \(A Private Plane Booking Dashboard\)](#) | [Splendid Mark](#)

- Developed FlexiFly, a fully responsive PWA private flight booking platform with app-like performance across devices.
- Built sleek, mobile-friendly dashboards for customers and admins using React.js and Tailwind CSS.
- Implemented secure authentication, advanced flight scheduling, booking management, and dynamic search filters.
- Integrated automated email confirmations and optimized workflows for seamless booking experiences.
- Engineered a scalable backend with Node.js, Express, and PostgreSQL for reliable data handling.

[SpillWord \(Apollo.io Frontend Dashboard Clone\)](#) | [Streams Consultants](#)

- Developed a frontend dashboard clone of Apollo.io using React.js and Tailwind CSS, replicating key features and UI components.
- Integrated advanced state management and dynamic routing to ensure seamless navigation and a smooth user experience.
- Customized and extended existing components to meet specific project requirements while maintaining design consistency.
- Worked closely with the client to incorporate feedback and make iterative improvements, resulting in a highly polished final product.

[Real Estate website](#) | [Knowledge Streams](#)

- Developed a Real Estate Website using React, Express, Node.js, Tailwind CSS, and PostgreSQL.
- Integrated Google Maps API for Property Listing and Locations.
- Implemented User authentication features, including login and Signup.
- Enabled users to create profiles and list properties for sale and rent, facilitating communication.
- Collaborated with the team to deliver a user-friendly platform that meets project requirements.

[Travelix \(Travel Agency website\)](#) | [Riphah International University](#)

- Developed Travelix, a responsive travel website, using HTML, CSS, and Bootstrap, offering comprehensive options for travel booking packages, hotel reservations, and guide bookings.
- Utilized Bootstrap framework to streamline development and ensure responsiveness across various devices, enhancing user experience.
- Integrated custom CSS styles to enhance the visual appeal and branding of the website, ensuring consistency across pages.

TRAINING & CERTIFICATIONS

- Google Cloud Computing Foundation | Google
- MERN Stack Development | Knowledge Streams
- Fundamentals of Predictive Project Management | Project Management Institute

CORE SKILLS

- Programming Languages: C, C++, JavaScript
- Developer Tools: Git, GitHub, VScode, Postman
- Frameworks: React JS, Node JS, Express JS, Tailwind CSS
- Databases: PostgreSQL, MySQL, MongoDB

EDUCATION

- Riphah International University (2021-2023)
Associate Degree Program Computer Science CGPA (3.64)
- National College of Business Administration & Economics (2024-2026)
Bachelor's of Computer Science
